

Atlantix Construction Ltd

Sustainable Procurement Policy

Atlantix Construction Ltd's policy is to procure goods and services which we need whilst at the same time managing the environmental, social and economic impacts associated with that activity to ensure that we meet the needs of stakeholders and the requirements of our customers. We will invest in the necessary controls to manage unacceptable risks associated with procurement decisions.

The company will develop and maintain effective and efficient methods of procurement that are undertaken in a safe, ethical, professional and sustainable manner. We will strive to create opportunities where a shared vision and values are demonstrated and sustainability is embraced and delivered.

The policy aims to deliver commercially viable benefits across the business through the consideration of the accepted sustainability factors employed directly and indirectly by Atlantix Construction Ltd. All procurement processes will be developed and monitored to ensure that such considerations are embedded and support the policy aims.

It is the intention of Atlantix Construction Ltd, in conjunction with our supply chain to:

- As far as is practicable, adopt the principles of sustainable procurement;
- Provide a safe and healthy workplace for our staff, customers and public;
- Use strategic partnerships/frameworks to encourage improvements in sustainability performance;
- Make our requirements clearly known to external parties via contractual mechanisms and appropriate communications;
- Effectively educate and communicate the sustainable procurement policy to employees;

POLICY AIMS

The aims of the company's policy are to:

- 1 Ensure resource efficient products such as fuel efficient vehicles, recycled content products, and energy efficient appliances are purchased;
- 2 Minimise the impacts of the construction service offered by using renewable energy where possible and minimising waste;
- 3 Minimise the impacts of the supply chain by considering the social and environmental aspects of their products and services;
- 4 Continually improve our supply chain corporate social responsibility by the sharing of best practice;
- 5 Ensure honesty, fairness and openness in our dealing with all in the supply chain;
- 6 Ensure that a sustainable procurement process is put in place which considers the recognised key sustainability procurement themes;

The Company expects the supply chain to:

- a) Provide a competent workforce employed in accordance with industry best practice;
- b) Deliver products and services to the agreed specification, on time and to the agreed cost;
- c) Keep abreast of market developments and provide innovative, cost effective and socially responsible solutions;
- d) Commit to and participate in continual improvement in line with the Atlantix Construction Ltd's sustainable procurement strategy;
- e) Apply the principles of this policy fairly and consistently to their supply chain;
